

EDA on Udemy Course Datasets Using Power BI

Hello!

My name is Jammal Adeyemi

Just here to present my analysis and insights to my respective colleagues in the building.

The process taken can be divided into 3

1. Udemy Courses

The background is a solid blue color. Overlaid on this are several wavy, horizontal lines composed of small, dark blue dots. These lines create a sense of motion and depth, flowing from the left side towards the right, with some lines curving upwards and others downwards.

“

Information is the oil of the 21st
century, and analytics is the
combustion engine

About this Datasets

- This dataset contains 3.682 records of courses from 4 subjects (Business Finance, Graphic Design, Musical Instruments & Web Design) taken from Udemy.
- Udemy is a massive online open course (MOOC) platform that offers both free & paid courses.
- This data has the following column names; `course_id`, `course_title`, `url`, `is_paid`, `price`, `num_subscribers`, `num_reviews`, `num_lectures`, `level`, `content_duration`, `published_timestamp`, and `subject`.

2. Transforming the Data

The background features a solid blue color with decorative wavy lines composed of small dots in varying shades of blue, creating a sense of motion and data flow.

- The dataset was provided by Blossom Academy
- Since the data is in CSV format we start by clicking on “Get Data” > “Text/CSV” > “Locate File Location and import”.
- Once done importing, I dived into the Power Query Editor to start making the necessary transformation.
- Corrected some columns with the wrong datatypes setting.
- Dropped duplicate & content_duration that was less than 1mins

- Extracted the “month”, “year”, and “year quarter” columns from the “published_timestamp” column.
- Created a new column, where I changed the “is_paid” column True/False to paid/unpaid.
- Calculated a new measure called “profit” to get the total profit Udemy made per course.
- Hide some columns that won’t be needed for visualization like url, is_paid, content_duration etc.

3. Analysis Questions

The background of the slide is a solid blue color. Overlaid on this background are several wavy, horizontal lines composed of small, dark blue dots. These lines create a sense of motion and depth, with some lines appearing more prominent than others. The lines start from the left edge and extend towards the right, with some curving upwards and others downwards.

➤ Subjects/Category –

- What is the distribution of subjects
- How many courses per subject
- Distribution of subjects per year
- How many people purchase a particular subject
- Which subject is the most popular

➤ Published year –

- Number of courses per year
- Which year has the highest number of courses
- Which month generate the highest number of course and profits
- What is the trend of course per year

➤ Levels –

- How many levels do we have
- What is the distribution of courses per level
- Which subject have the highest levels
- How many subscribers per level
- How many courses per level

➤ Distribution of Courses –

- Which courses have the highest duration (paid or not)
- Which courses have a higher duration
- Duration vs number of subscribers

➤ **Subscribers –**

- Which course has the highest number of subscribers
- Average number of subscribers
- Number of subscribers per subject
- Number of subscribers per year

➤ **Distribution of Courses –**

- Which courses have the highest duration (paid or not)
- Which courses have a higher duration
- Duration vs number of subscribers

➤ **Correlation Questions –**

- Does the number of subscribers depend on Price, and No of Review
- Does price influence Subscription and Review

4. Data Visualization

I. Subscribers Analysis

The background features a solid blue color with decorative wavy lines composed of small dots in varying shades of blue, creating a sense of motion and depth.

Avg. No of Subscri...

No of Subscribers by Course Title

Popularity of Each Course Type

Average No of Subscribers per Course Type

- The most popular subject amongst the subscribers is Web Development, followed by Business Analysis
- Udemy has 12M total subscribers between the duration of 2011-2017
- Average number of subscribers: “3193”
- The maximum number of subscribers for a course is “269k”, which is “Learn HTML5 Programming from scratch” which falls under “Web development” Subject category.
- Filtering further, I found that the year it occurs was 2013 which has a high number of unpaid subscribers.

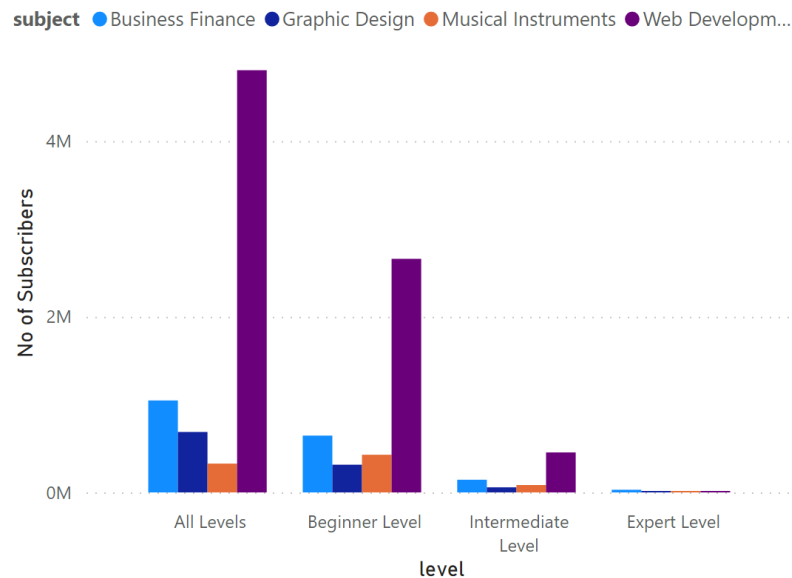

II. Level Analysis

The background is a solid blue color. It features decorative white dotted patterns that form wavy, horizontal lines. These patterns are located on the left and right sides of the slide, framing the central text. The dots are arranged in a way that creates a sense of movement and depth.

No of Subscribers per Level

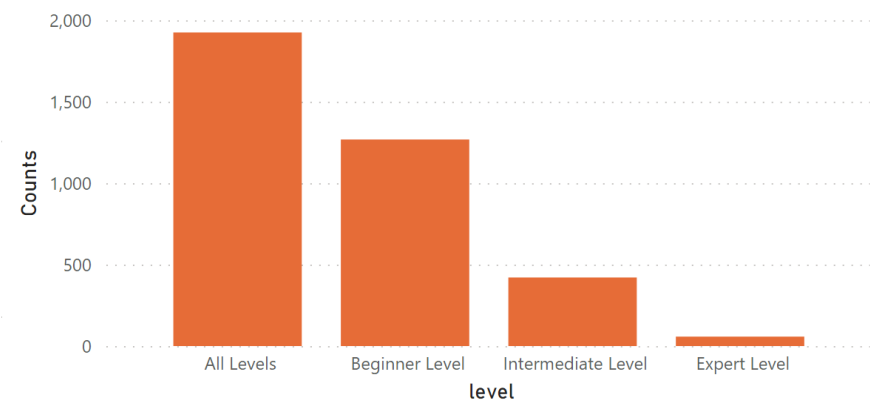

Levels & Subscribers per Subject Category

Levels & Lectures per Subject Category

Distribution of courses per levels

- We have 4 levels as we can see from the visualization.
- “All Levels” has the highest distribution based on subscribers and courses.
- “Web development” subject generated the highest per lectures & subscribers across all levels.
- “2015” had the highest number of subscribers per level & courses.

Distribution of course cost

Courses on Udemy that are paid/unpaid

- The max price is “\$200”, filtering further to get the course title and subject which are “Ultimate Investment Banking course” and “Business Finance” respectively.
- The most profitable course made over \$24M, which is the “Web Developer Bootcamp”
- \$20 has the highest distribution of course cost, followed by \$50 then \$0.
- “Web Development” has the highest number of unpaid subject.
- “Business Finance” has the highest number of paid subject.

- 
- **“Web Development” has the highest number of subject per review across all level, followed by “Business Finance”.**
 - **“Web Development” has the highest number of subject per number of lectures across all level, followed by “Business Finance”.**

IV. Year Analysis

The background of the slide is a solid blue color. Overlaid on this background are several wavy, horizontal lines composed of small, dark blue dots. These lines create a sense of motion and depth, with some lines appearing more prominent than others. The lines start from the left edge and extend towards the right, with some curving upwards and others downwards.

Number of Courses per Year and Profits

Profits by Month

Subscribers per course across the years

Total Udemy Subscription across the years

- **2015 has highest number of subscribers across the years**
- **2015 generated the highest profit across the years**
- **2016 has the highest number of courses published on Udemy**
- **Web Development in 2015 topped the chart when it comes total subscribers across the years**
- **March generated the highest profit in the month section**

V. Correlation Analysis

The background of the slide is a solid blue color. Overlaid on this background are several wavy, horizontal lines composed of small, dark blue dots. These lines create a sense of motion and depth, with some lines appearing more prominent than others. The lines start from the left edge and extend towards the right, with some curving upwards and others downwards.

Does Price Influence Review

Does Reviews Influence Subscription Per Subject Category

subject ● Business Finance ● Graphic Design ● Musical Instruments ● Web Development

- The Price actually influence users subscription as there was high intake on free courses on the platform.
- The price influences the reviews as users that subscribe for a course has a high reviews compare to the free courses.
- The price influences what kind of subscription the user made, as there were more subscribers taking “Web Development” free subject.
- Lastly, users review had a some influence to user subscription but not as much has prices.

A photograph of two men in business attire sitting outdoors. The man on the left is wearing a white shirt and dark trousers, holding a smartphone in his right hand and gesturing with his left hand. He is wearing a watch with a black dial and a metal link bracelet. The man on the right is wearing a dark suit jacket. The background is a blurred outdoor setting with greenery and a wooden railing. A decorative dotted line graphic curves across the middle of the image.

RECOMMENDATION & CONCLUSION

From my analysis,

- Udemy has had its fair share of glory. From the data available, the peak was in 2015 after which it had a decline.
- This could be due to a surge of other learning platforms.
- The most popular course across all time, price and level is web development.
- So, if I am to put a course on Udemy it would be under web development.
- Price range of 20-50 USD tagged “All Levels” and between 10-12hrs long.

Thanks!
